Experience

Front End Software Engineer | Kroger

6/21 - Current

- Developed and supported multi-banner CMS powered React assets supplemented with unit tests written with Enzyme.
- Participated in the discovery and implementation of new CMS powered assets and components.
- Supported feature enhancements of existing code, projects, and the resolution of technical debt.

Front End Developer | WebstaurantStore

5/20 - 6/21

- Collaborated closely with a team of designers in implementing new user interfaces and reusable components for a number of internal projects within Clark Associates - prototyped in Figma and architected with performant components from the Ant Design component library.
- Maintained accessibility of storefront platform so that ADA compliance is being achieved.
- Improved Webpack performance for speed and efficiency in Admin Portal, ultimately reducing build times in half for running and deploying projects.

Web Developer | eLink Design

5/19 - 4/20

- Designed and developed responsive, cross-browser compatible websites.
- Coordinated directly with clients from the initial project planning session to the final deployment of their product, facilitating communication and implementing feedback promptly so that timelines were being met.
- Clientele included many local and regional based companies.

Projects

WeatherFi

- Application that generates the three day weather forecast using the WeatherAPI architected with Ant Design components.
- User can search by city and state or zip code to retrieve forecast for their location, active forecast defaulting to current day.

Calculator

- React powered calculator with a stylish and accessible interface.
- Evaluates expressions by adhering to correct order of operations.
- Validation states applied to controls to ensure that user error is minimized.

Quiz Time - Video Game Ed.

- Intuitive trivia game that tests players on their knowledge of video games with a set of ten randomized questions retrieved from the Open Trivia API.
- Visual cues are leveraged to alert the player if their selection is correct or incorrect, along with a system that tracks their progress with each question.

Skills

Front End Development

HTML5, CSS3/Sass, JavaScript (ES6), React, Redux, NextJS, Typescript, Axios, Ant Design, Bootstrap 4, Tailwind, Unit Testing, Cross-Browser Optimization, Responsive Design, Accessibility

Back End Development

Node.js, Express, REST

Workflow & Software

Git, Agile, Webpack/Babel, Figma, Storybook, Postman, Netlify, Trello

Education

DevMountain

Full Stack Development Bootcamp
1/19 - 4/19

University of Kentucky

BS in Human Nutrition - 2015
Cumulative GPA: 3.7 / 4.0

Certifications

Advanced CSS and Sass: Flexbox, Grid, Animations and More

Jonas Schmedtmann

Complete JavaScript Course (2021)

Jonas Schmedtmann

Epic React

Kent C. Dodds

React - The Complete Guide (2021)

Maximilian Schwarzmüller

React Testing with Jest & Enzyme
